Summary

Small stands mounted on the phone case to protect the lens from scratches

[Gadgets](#) > [Portable Devices](#)

Small stands mounted on the phone case to protect the lens from scratches. The height of the leg is 1.2 mm and the diameter is 10 mm. The feet have been tested on the S23 Ultra case and fully protect the lenses, especially when the phone is placed on them. The legs were mounted on double-sided adhesive tape. Printed from PLA material.
