Summary

A simple base for the awesome Spiral Vase Mode Sierpinski Pyramid.

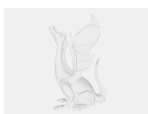

[Household](#) > [Home Decor](#)

A simple base for the awesome [Spiral Vase Mode Sierpinski Pyramid](#).

Makes the bottom of the pyramid more opaque, enhancing the effect when you pick it up and inspect it. Otherwise the bottom is quite translucent (and somewhat fragile) depending on the area because of the way it's printed in vase mode. It also helps make it a more finished decorative object.

Sand the underside of the pyramid and the top of the base then glue together using superglue.
