Summary

Spoolholder for the Creality K1. It uses the original given support, moving the spool placement from behind to the side.

Spoolholder for the Creality K1. It uses the standard given support, moving the spool placement from behind to the side. I used M3 screws for the mounting. I have done two variants, one for just the spool and one with a support for the ptfе tube if you have it. I hope someone could find these models useful.
