If you want to wish a Merry Christmas in a particular way, this could be for you

THE VISUAL EFFECT IS POSSIBLE EVEN WITHOUT LED OR ADDITIONAL LIGHTS AT THE REAR. as you can see from the photos even by exposing it to the sun. With LEDs, it is more clearly accentuated

Simple template for Christmas gifts. Greeting card

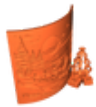

I created the image with certain plays of light to enhance the lithophane objects. It prints with any FDM, low speed, four perimeters and 100% infill.

It can be printed with PLA with light colors.

If you use the colored ones, you will have different effects.

Good fun
