Now you can also print a napkin holder with these gnomes!

Edit 10. 12. 2023

Thank you so much for all the downloads! I was so happy for the first 100 in about 3 days, that I immediately started to work on three new gnomes. So here they are, the gnomes number 7, 8 and 9. I also made some little changes to the gnomes 1, 2 and 3. Plus, on special wish of my mom, gnome no. 5 gets feet.

Please upload your prints if you can, I'd love to see which gnomes you like the most.

---

I couldn't find much designs to choose from as window & door decor for the winter season. So I took my marker, looked up some Google inspiration and sketched a few gnomes.

Made with a nostalgic thought at paper cut decorations we used to make with my mom when I was a kid.

I use poster putty to attach them to the door & window, so I didn't give them loops. But all of them have some holes in their hats, so it should be possible to put them on a string.

I'm planning to make some more gnomes and also do some redesigns and variations, so if you like these, be sure to check back in a while!

Please do not repost on other servers. If you insist it should be elsewhere, tell me, I'd put it there myself. If you want to sell or redesign, please ask me first.

Printing:

The gnomes are around 15 cm heigh. Printed with 0,4 nozzle, with so much detail, the prints are not perfect. If you tend to perfectionism, I recommend scaling up the designs or using a smaller nozzle.
That being said, I did print them in this size with 0,4 nozzle, the results you see on the photo.
