## Summary

A1 MINI and A1 - POOP COLLECTOR basket is designed to collect purged filament during printing.

The A1 MINI - POOP COLLECTOR basket is designed to collect purged filament during printing, featuring a bottom that can easily open for convenient emptying of the basket without the need to remove it.

To unload the basket, simply lift the axis as much as needed, or as I prefer, place the printer on the edge of the table so that you can directly empty the basket into a trash bin.

### UPDATE V2 - BROWN IN PHOTO

As many of you wanted the POOP COLLECTOR closer to the POOP EJECTOR, I have revised it to address the request. The channel is now slightly bigger as well.
