

Wemos D1 mini with locking pin hole + LED Strip Case

Rudi Vader

[VIEW IN BROWSER](#)

updated 6. 12. 2023 | published 6. 12. 2023

Summary

This case fits an Wemos D1 mini board with LED strip connector soldered on top.

[Hobby & Makers](#) > [Electronics](#)

No supports needed. Printed in PETG.

The connector itself is stuck to the board using some nano tape, but some hot glue would do the job too. The locking pin can be used and does not need to be cut off. Fits in the top
