[claycutter](#)

I created this model to frame my polymer clay art, and wear it as a pendant. Included with the model is the cutter needed to size the polymer clay with a good sharp edge for precise fitment of the clay to the frame. The pendant is 38mmx22mm and prints easily with PLA. I use resin to complete the pendant but glue or headpins could work just as well. I have plans to make an earring set to match, follow me for more unique designs.
