Summary

Ultimate Ice Scraper, long version (30cm).

[Hobby & Makers](#) > [Automotive](#)

Here comes the longer version of the Original **Ultimate Ice Scraper** from **Genghis**. This one is around 30cm in length, for vehicles with larger windshields.

I printed this with 4 walls. No supports needed when printed upside down. Watch out for warping, depending on the used material.

I hope someone finds this useful! Thank you to the original Maker for the inspiration.
