Mount for Tapo C110 Camera using Sneaks design. Uses original camera screw. Disassemble original base, unscrew ball mount, and reuse screw for this mount. Tried the socket mounts and they were too weak and broke the wall. So designed this. 2 different mounting options. Print however you see fit. I printed with grid style. Infill whatever you want.

This remix is based on

Articulating Raspberry Pi Camera Mount for Prusa MK3 and MK2
