Tags: [watch](#) [watchband](#) [watchstrap](#)

This kit is a repair kit and strap conversion adapter for the CASIO F-91W. It solves the Achilles' heel of the F-91W, the belt durability problem.

This adapter is compatible with 22mm NATO belts.

The watch body can be attached with a snap-fit.

I have been testing this for about a month and it still remains without falling off.
