This is a remix of a solid iPhone 14 Pro case made by Troyerse, that automatically pauses on layer 13 (if printing with the 3MF file on Bambu, or the pre-sliced .g-code on Prusa MK4 (IS)), and allows for the installation of a thin MagSafe magnet ring. I made the cavity spacious enough to accomodate just about any brand of these rings you can find online. I recommend installing 2 of them sandwiched together for proper MagSafe operation. I have tested it on the official MagSafe charging puck, and it holds well, and charges.
