Summary

A plate with some picatinny rails on it for mounting red dots and things to organize them

[tactical](#) [romeo](#) [reddot](#) [sig](#) [magnifier](#) [holosun](#)

Ive make up a little plate with some picatinny rail sections on it so I could organize my extra optics a little better. This will allow 3 or 4 red dots, or magnifiers to be mounted to it. I would recommend using the three rail version if using QD mounts.

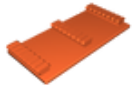

Edit 3/27/24

Added a couple more options that should use a bit less filament and have holes in the pic rails if you wanted to mount them to a wall.
