Update 15.12.2023:

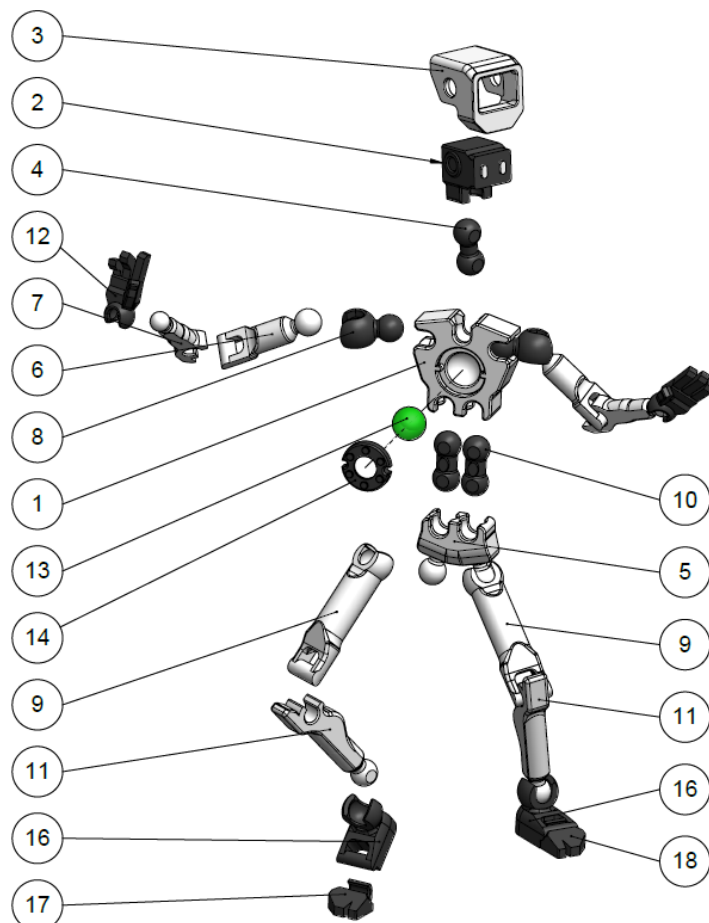

I've added a few new head variants (Smile Eyes, X-X Eyes, Heart Eyes).
And a new hand variant (middle finger) has been added to the STL data.
Have fun :)

Update:

As requested, I have now combined the parts into two print sets called
ETP-Bot-V2_set 1 & ETP-Bot-V2_set 2.

Thank you, for the feedback :)

Here you can find the new version of the (Easy-to-Print) ETP-Robot.
 The action figure can be printed entirely from PLA, and the parts are very stable even when made from PLA material thanks to the alignment of the print lines.
 The individual parts are assembled by hand - see the PDF drawing and parts list.

Nr.	Description:	Material:	Amount:

Please leave your feedback. I would be happy to make further improvements to the ETP bot.

Have fun printing.

best regards
