This dice tower is basically an update of this design: <https://www.printables.com/model/372738-scifi-gothic-dice-tower>

Since there were complaints that the dice do not go through, I decided to increase the openings a bit to make them roughly 35mm wide, this should now really fit for your dice (and if you have larger dice, make sure to upscale the whole thing. Probably you are a giant and the dice tower will be too small anyway.

This tower was created with my terrain generator, that is part of my generator suite, offered via patreon. Check out this overview page to view introduction videos and see all currently compatible parts: <https://udos3dworld.com/generator.html>

You're a creator and want to have your parts compatible? Sure thing! Contact me or check and I will tell you how to create new libraries for the terrain generator!
