Hello everyone :)

This is a nice super simple model to print that can have 3 spooky functions :)

(Commercial license available on request)

1 - It can work as a really cool Halloween lamp

2- It can work a lamp / projector that will project spooky shapes on the ceiling (see pictures).

3-It just looks very cool and spooky even when it is turned off :)

If you would like to use it just as a lamp you can use a USB light bulb (like a Toolmoon USB light for example) or some simple LED strip lights.

There is an adapter included that will allow you to rap around the strip light with no problems :)

If you would like to use it as a lamp / projector of shapes on the ceiling then you will need to use a directional LED source just like the one at the back of your phone. I have included a link to what I have used myself in the pdf documents included.

The model includes 4 different Pumpkin Top Caps with projecting cut outs:

-PLANE

-WITH BATS SHAPE

-WITH GHOSTS

-BIG FACE

I could add more on request :)

3D PRINTING SETTINGS

Super easy to print everything at 0.2 layers NO support needed in any of the parts.

I have included a pdf document with some printing tips and material / colors list. Also details of what Lights I have used.
