Tags: [gridfinity](#) [gridfinitybin](#)

The Bins are designed to use less filament so there is no place for magnets, if you would need them please feel free to tell then i will upload some with magnets to.

I used the fill feature in Orca Slicer to fill the background of the text with an other color, but you could also just paint the text in a different color.

There are also some divided bins for some sizes where I dont have so many and some divided with the same size for sorting different screw color.

If you need some more sizes just tell me.
