Model is split into 2 sections to fit on Bambu X1C build plate.

Pieces can be attached with CA glue.

Printed with PETG, 3 perimeters.

Includes 4 screw holes.

For more details, see [YouTube video](#)

****NOTE:** In my photos, you can see an extra joint because I accidentally made the original model 1" too narrow. I have fixed this in the uploaded model files, so the extra piece is unnecessary.
