### Summary

'Mounting Main Body' with added heat deflector

[3D Printers](#) > [Other Printer Parts & Upgrades](#)

Tags: [ratrig](#) [eva3mods](#)

see through part of cpap hose seemed a little thin

afraid the toolboard would melt it, so made little thin layer between

Which the slicer would not see (too thin at .2mm wide) so fake made it .4mm thick and then it still only printed it .2mm thick, ah well

Printed with arachne walls (Orca) and deflector pointing up

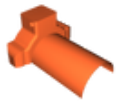

### This remix is based on

EVA3  
CPAP  
Fan  
Cooling  
Duct
