There are similar adapters already, but I decided to give it my own touch and designed it from scratch.

This adapter will fit the 18V Makita DVC750LZ vacuum and the 18V Makita DBO180Z random orbit sander.

The walls are 2mm thick.

One side is made to fit into the vacuum end. It has a taper of 1mm.

The other side is made to go around the sander end. It has no taper, since the sander end already has one.
