### Summary

Really simple and cool way to store toothbrushes out of the way and easily accessible for kids.

Print however many you need and you can merge them together to make one big print.

Print with .4mm nozzle, a .6mm nozzle is too big and the gear teeth don't work right.

Assembly:

To attach to the wall insert the gear on the far left first (the screw hole is in the gear track) and then screw it to the wall.

For all other slots insert the gear and then the peg. The peg stops the gear from going up too high and falling out when a toothbrush is placed or removed.
