Summary

These are goggles I made to cosplay as Tech from Bad Batch.

I tried to design these as accurately as I could using the footage from the show as my source material.

There are two versions - one in good condition like he wore and another version that is damaged like they found in the final episode of the most recent season.

There are also two different versions of the scope/light. Just stylistically different. Choose whichever you like better.

You will need to print one of everything and two of the nubs.

Assemble with super glue.

I used yellow plexi glass for the lenses.

https://www.amazon.com/gp/product/B09F8XDQ68/ref=ppx_yo_dt_b_search_asin_title?ie=UTF8&psc=1

I added an elastic strap to mine that is tucked in through the slots in the goggles and then sewed together.

https://www.amazon.com/gp/product/B0869KZ9CT/ref=ppx_yo_dt_b_search_asin_title?ie=UTF8&th=1

And I also added an LED with a battery and switch to the Scope/Light. The files have holes in them that allow you to thread the wiring.

For the broken version I added a flickering LED.

LED:

https://www.amazon.com/gp/product/B077XBHDT5/ref=ppx_yo_dt_b_search_asin_title?ie=UTF8&th=1

Flickering LED (for damaged goggles):

https://www.amazon.com/gp/product/B077X938JK/ref=ppx_yo_dt_b_search_asin_title?ie=UTF8&th=1

Scope/Light Lens:

ALL in ONE 20pcs Flat Back Clear Glass Dome Cabochons Clear Magnifying Cabs Non-calibrated for DIY Photo Pendant Craft Jewelry Making (14mm-20pcs) -search on Amazon

Please use support and rafts/brims as needed for your printer.

The scale may need to be adjusted to fit your head . . . as it is now at 100% it fits me perfectly.

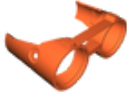

This is my first design on Printables (I'm a sophomore in High School and just learned CAD) so please ask questions and let me know what I might improve.

Please do not sell printed versions without my permission.
