First things first, big shoutout to https://www.printables.com/@MikeVvT_145.

I have used his model as a base to build this one.

I wish I had the knowledge to put the labels on the side so you can see it better, but I'm still a newbie to 3D Modeling and I'm only using tinker cad. Still not confident enough to add a text on a curve surface, but feel free to do it!

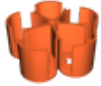

This remix is based on

Guitar Pick Holder
