updated 7. 12. 2023 | published 7. 12. 2023

### Summary

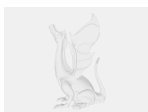

This is everything needed to make a 2m Antenna with a PL-259 connector and a cut down Ford FM Antenna Whip.

I use this as the antenna on my Racecar, works well for use with a tuned 2m Antenna, I have mine set up for 1/4 wave. I don't use the base since this is a racecar but I figure the base could help someone out if they want to try to use it for mounting.
