Please comment, rate, and post a make!

I really liked the holder design modifications done by FTBT, but it didn't quite fit the [branded Xiaomi precision screwdriver](#) (affiliate link) set. This is a revision, modelled from scratch to fit that case. Aside from resizing, this maintains the ability to grab the driver/bits without remove the case from the holder. It does require removing the outer portion of the case.

Will require two blank inserts to attach to the HSW.

Be sure to check out [my other models!](#)
