This holder clamps on Skywatcher's steel tripod legs and offers a place to store the battery during use.

It's made for Skywatcher's steel tripod that comes with EQM-35 mounts and above.

Those USB-C PD power tanks can provide up to 12V at a maximum current of 1.5A which is enough to power a 200PDS on a HEQ5 (I haven't tested anything bigger). You need a special cable to trigger the 12V voltage, I use the one that came with the Omegon battery.
