Summary

Small helper to better take out .22 ammunition from topshot etc.

Tags: [ammunition](#) [caliber](#)

I have designed a practical and efficient two-part ammunition removal helper for .22 caliber cartridges, such as those from TopShot and other manufacturers. The first component is an ammunition holder without legs, designed to float in the air. The second component is a more conventional black holder with legs. Both parts feature an elevated removal mechanism, making it easier to extract the ammunition.
