This small house will make you all cozy and snugly during winter season. Add a LED candle with the smart attachment and illuminate the tiny windows!

Fitting LED candles can be found [HERE](#)

WHERE TO BUY

If you like my design you can support me by downloading the complete collection [HERE](#)

Warning - do not use real tealights

3D PRINTING SETTINGS

IMPORTANT - Print (the windows) in white (or very light color) to make sure the LED light is visible.

Use at least 4 to 5 walls if you'd like to avoid light coming through the house walls.
