Tags: [box](#) [socket](#) [sockets](#) [ruggedbox](#)

I'm excited to present a carefully designed rugged box for storing 1/2" sockets. This storage solution is built with a focus on easy socket removal, ensuring a smooth user experience.

The box has a maximum height of 46mm, but I've designed it in Onshape to be parameterised, allowing for different heights to suit various needs. Just contact me if you're in need of a small change

The box is robustly constructed for durability and longevity, designed to withstand daily use. It's an excellent choice for anyone needing a reliable and efficient tool storage solution.

For assembly, M4 screws of 25mm length and corresponding nuts are needed for the clips. Please note that the current version of the clips requires minor modifications, which I'm currently working on to ensure optimal functionality and ease of use.
