Summary

Wall Mount EGO Battery Holder.

[Household](#) > [Outdoor & Garden](#)

This is a remix of <https://www.thingiverse.com/thing:1603228>

I changed the screw to be a #8 screw and added a countersink for M5 washers to add some strength to the mounting.

Holds my rather hefty 7.5 Amp/Hr battery without issue.

Printed w/ Prussament PLA, std settings and 15% infill standing up on the bed like it would be mounted on the wall.
