updated 10. 12. 2023 | published 10. 12. 2023

Summary

Vase Mode is hard to find in multi-square configurations. Print about 6mm of solid base layers to make it work.

Vase Mode:

Set >6mm of solid base layers.

Vase Mode is hard to find in Gridfinity multi-square configurations, but for good reason. The space in the base makes you print about 5mm of solid base layers to make it work.

Unfortunately, PrusaSlicer doesn't yet allow you to start Vase Mode in the middle of the print. It's all or nothing.
