This Security Bot is a model kit from video game Starfield. Model is FDM friendly - can be printed without any supports as a model kit.

Ready for testing print.

I also added a ONE PIECE & TWO PIECE versions (No conversion, bunch of errors, but worth the effort), they can be scaled much more easily.

Kit parts need to be glued together.

I added notes to printable pieces, if you want to print in different colors.

I will definitely print this model, paint it and post it here later.

Main model has 5x5x5cm volume size. (Total volume 5x5x8cm)

Expected print time of the kit with Prusa MINI+ is about 10 hours with 0.10 Layer Height and stock slicer configuration (just different infill).

If you have any suggestions, let me know. I can do similar models if you provide screenshots.

Be creative :)
