updated 8. 12. 2023 | published 8. 12. 2023

Summary

Added a wider mouth at the top to allow faster "dropping" of the coins vs placing them one by one.

[Gadgets](#) > [Other Gadgets](#)

Added a wider mouth at the top to allow faster "dropping" of the coins vs placing them one by one. I am not a Fusion 360 user and am a hack on Tinkercad at best. The dimensions are not perfect but it printed fine.

This remix is based on
