Are you looking for a quick easy print to hold your headphone with a some cable management to boot? Give this small but mighty mountable headphone holder a try.

Print in less than an 1.5hours (on my "slow" printer) for 14 gs of filament optimized for strong 1"vhb tape.

Has some cable management bellow for headphone input cord or other cables

Tested in PETG

Featuring 2inches of inlayed 1"VHB tape can comfortably hold 1lb worth of cans and cords.

The tape I use <https://amzn.to/3Rx09vT> (affiliate link)

Model files

small-but-mighty-headphone-holder.stl

☐ print on side to preserve inlay & strength
