Tags: [forstner](#) [forstnerbit](#) [gridfinity](#) [gridfinitybin](#)

Decided to make some holders for my forstner bits in my tool chest. These are as universal as I can think to make them as there is some variation in shaft and shank lengths, but the diameters seem consistent. I based these off of measurements of bits I bought from Rockler wood working.

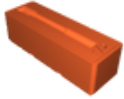

I set the height to accommodate up to 2 1/2" bits whenever I get around to designing wider bins.

The color changes are done just by setting a color change in the layers.
