Introducing the "Autumn Bliss" —a 3D-printed maple leaf pendant capturing the essence of fall.
Its unique two-tone look, achieved by changing colors mid-print, mirrors the warmth of autumn hues.
For optimal detail, print at 0.1mm layer height.

I put in a lot of design, testing and engineering hours into all my projects, while keeping my designs free and available for all.
Please consider [buying me a coffee](#) to show your support and don't forget to leave a like and share your prints!
