Wanted to make up an easy to print but fancy picture frame for my sons class. Wanted it easy to make 30 without issues. It is a two color print. If you can't do the two colors, just print it in one. The back piece with the year just presses into the back of the frame to hold the photo.

Printing:

1. Pick you frame

2. Upload into the slicer 1of2 and 2of2 at the same time so you can pick your colors
3. Make sure to orient the frame front down and date up.
4. Print
5. Put in your photo, 1 3/4"x 1 3/4" square.
6. Press the back into the frame
7. Hang on your tree with your favorite rope etc
