I wanted to put my snap ship tactics cards in sleeves. The consoles that are sold for the game do not fit cards with sleeves so I made some simple consoles. One for chassis cards and one for parts cards.

The legs are optional. I did have to widen the legs holes just a bit after printing to make the legs fit. But I think that has more to do with my printer not being fully tuned yet and having a little elephants foot. The consoles are 4mm x 1mm magnet compatible.

I have included .STEP files if anyone wants to edit.
