Summary

This is a caddy for the storage of API Aquarium testing equipment.

Tags: [aquarium](#) [fish](#) [caddy](#) [fishtank](#) [aquariumaccessories](#)

A caddy I built to hold my API testing equipment. It is a three part build. The handle is printed separately and then glued to the body. I used overture PLA professional. Great little storage device. Beats the one that the test equipment comes in. Also there is a spot either side of the handle to hold syringes. The syringes that I use are 12ml made by ideal instruments.
