I believe it's more discrete than other designs because it doesn't have the "roof", instead there is just an inner ridge on top keeping the tag in place while letting the silvery part of the tag be visible.

Prints well with PETG and brim. Supports for the "arms" might be necessary depending on your specs and settings.

To attach to your (16 mm) collar, fold the collar by making a "V" with the fabric and slide it in to the holds symmetrically.

Thanks, future_luddite (@thingiverse) for the [inspiration](#)!
