As a small extra with the new dwarf terrain library, I created a dice tower with it!

The dice tower is separated by levels, so you can print it mostly without support and glue the levels together. Printing the full tower is not recommended since a lot of support would be needed.

The terrain generator is a small tool that lets you define the size of the building/ruin, and the tool will fill this with the parts from the library. All other dwarf terrain releases from today were created with the generator suite. It is available as part of my full access patreon rewards, more info on the generator suite can be found here: <https://udos3dworld.com/generator.html>

If you want a physical model of this, check out this etsy shop (not me): <https://www.etsy.com/listing/1704275414/dice-tower-dwarven-castle-style>
