C-130 Hercules

- F-16

- MiG-29

Shapes are simplified a little for easier use

I don't have any plans for adding more planes but there is some small possibility for making it

More cookie cutters:

https://www.printables.com/@C47_3d/collections/147977

Made for 0.4mm nozzle

Walls are 0.8mm thick

No supports
Minimal infill (for stiffness of the base)

Butter cookies recipe

300g (~10.6 oz) wheat flour
150g (~5,3oz) butter
70g (~2,5oz) powdered sugar
1 egg, cold
1 small flat spoon of baking powder
pinch of salt

You can add 30g (~1oz) of cocoa for chocolate taste. Use 30g (~1oz) LESS flour and 10g (~0.33oz) MORE sugar then

Mix everything until fully combined. Put in the fridge for at least 1 hour.

Then knead it for a while, pin out the dough to around 5mm (~0.4") and cut the shapes with cookie cutter.

Bake with 180°C (~355°F) - with both top and bottom heaters on - for few minutes (depends on dough thickness, oven and it's settings) - I baked mine for about 6-7min. Pull them out when they will get a darker color on top.
