Summary

This is a cable cover for “Logicool M125” mouse to cover the exposed part of the wire.

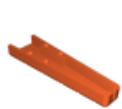

Build info

- **No support is required.**
- It can be printed from **PLA**.
- It consists of two parts, and the mechanism is to fit the cylinder of the other part into the hexagonal hole in one part.

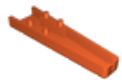

- I printed with 0.4mm nozzle. But it may **NOT** work well with 0.4mm nozzles because of the small dimensions of the model.
- **It is strongly recommended that you use a smaller nozzle or scale it according to the size of your mouse.**
