[fastprint](#)

These were created for a charity event where stall holders got free coffee while at the event. Search printables for an option, and there wasn't one, well now there is. It's a fast print and many can be fitted on a single build plate. For best results use multi colour having the coffee icon in a different colour. Prusa slicer will suggest this for you when you slice it.

This is a fast print and uses less than a gram of material for each token.
