updated 22. 5. 2021 | published 22. 5. 2021

Summary

....just a simple yet functional remix for my own need to hold EV Cable on facade and fence...

[Household](#) > [Outdoor & Garden](#)

Best printed from ABS or PETG... 25% infill, no need for supports.

The first can be “hanged” on fence or anywhere needed (also has no hole - 15mm is the inner width, it's intended to have inserted eg. furniture anti-slip pad), the second with the hole and “anti-twist” part can be mounted eg. on wood ventilated facade.

This remix is based on

Cable Hook
