### Summary

For use with the honeycomb system

[Hobby & Makers](#) > [Organizers](#)

Tags: [honeycomb](#) [honeycombstoragewall](#)

Lots of grip with many hex plugs for the wall. Makes the trays super strong on the wall. This model doesnt need support.

I included my step file used for the very start of a tray design. Design all shapes n sizes tray. Hide the unused hex models and combine your tray with the hex you want printed.

Share so I can use :)
