## Summary

A model of the centoporte (literally translated "hundred doors") passenger carriage, in service from the 20s to the 80s

[Toys & Games](#) > [Vehicles](#)

A model of the centoporte (literally translated "hundred doors") passenger carriage, in service from the 1920s to the 1980s on the Italian state railways.

Very simple level of assembly given by the joints, detailed exteriors and interiors embellished with 74 seats and 2 toilets left to the imagination...

For assembly you only need glue, no screws are required.

To make the window glass I used the clear plastic lid of a box. I dulled the toilet glass by scratching the plastic with fine sandpaper.

I divided the larger pieces (roof and body of the wagon) to facilitate and reduce printing times.

Print in 0.2 for larger pieces and 0.1 for details.

I only used PLA

The model is made to be in scale with the FS691 locomotive and the tracks of which I leave the link.
