

Single Nextruder Nozzle Box

[VIEW IN BROWSER](#)

updated 9. 12. 2023 | published 9. 12. 2023

Summary

Box for a single Nextruder Nozzle the same size as the original box (without text, add it in PrusaSlicer).

Tags: [3dprinting](#) [nozzle](#) [nozzlebox](#) [nozzlestorage](#)

My ObXidian Nextruder nozzle came in a plastic bag and not in the protective box that the brass nozzles came in, so I made this replacement with the same outer dimensions as the other one.

The model does not have any text, the text can easily be added in PrusaSlicer.

The box in the image was printed standing up with 3 perimeters and no infill to get a smooth translucent look in clear Prusament PETG (0.2 mm layer height and 0.4 mm nozzle).
