Tags: [infill](#) [soapdish](#)

A soap dish made with custom patterns for Tiled Infill in Cura, with several patterns included in the zip.

You can use the included project file, create your own using calibration shapes like I did in the video, or use one of the existing soap dish models intended to use with infill, but with different patterns :) The process is a bit involved, but you can also create your own patterns.

A video of the process and the results:
