Two part model - one is resizeable panel, the other is the multi-layer gingerbread character. Designed to be printed with color changes. Use the as-sliced .3mf to get the intended color changes. First color is the background - use festive clear colors to give the light a warm colored tone suitable for the holiday. Second color should be clear filament. Third color is the buttons and mouth/eyes. Fourth color is the body.

By using clear filaments, you get a nice “frosted panel” appearance.
